Dear Tommy:

On behalf of the Senior Companion, Foster Grandparent and Senior Employment Programs, our staff would like to express appreciation to you for participating in our annual health fair and providing health information on March 23, 2012 at the Tenth East Senior Center.

We appreciate the efforts made by you in ensuring that this event was enjoyable, successful, informative and beneficial to our senior volunteers and other senior participants. Many of the seniors have commented on how informative your program is. They are extremely grateful to be the recipients of such considerable information; especially when it pertains to learning about issues that are significant to their personal lives. We are appreciative of you for helping us to educate them in the capacity of their wellbeing. Thanks for all of the hard work and effort that you put forth in assisting us with fulfilling our goal in providing professional education and medical screening to our seniors. We express gratitude to you personally for taking the time from a busy schedule to provide this valuable service on the benefits of Tai Chi. The seniors enjoyed participating in the exercises and learning about the advantages of breathing properly and partaking in some form of daily activity. They appreciate the donation of the Tai Chi videos that you provided for them to take home. Our estimation is that we obliged two hundred to two hundred and twenty five seniors at the health fair.

We look forward to working with you in the future.

Thank You,

Rose Maree Sazesh
